

NANOGRASS

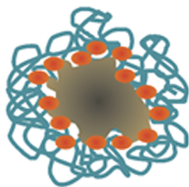

Ecofriendly Agrochemicals

**PATENTED
TECHNOLOGY**

What is Nanograss?

Nanograss is a platform for developing nanopesticides with reduced environmental impact

CARRIER: clays & zeolites

COATING: food-grade biopolymer

ACTIVE INGREDIENT

ACHIEVEMENTS:
reduced active ingredient leeching
longer stability

Advantages of Nanograss formulation

WATER

Controlled pesticide release
f-60% than active ingredient

SOIL/GROUNDWATER

Reduced loading in soil:
<50% of active ingredient lost
by infiltration

AIR

Reduced volatilization:
need for lower dosage
